Saget, L. le and Demartres, J.
TELEGRAPH SATELLITES. [1963] 18p
Order from SLA \$1.60

63-20640

Trans. of Communication et Electronique (France) 1962,
no. 3, p. 36-43.

DESCRIPTORS: *Telegraph systems, Telegraph equip-
ment, Networks.

Owing to the present structure of the French automatic
telegraph network, it is common to see large points of
concentration of telex subscribers at relatively long
distances from their automatic connecting switches.
That is why the French Administration was prompted to
recommend the use of a particular type of installation,
the "telegraph satellite," which makes it possible to
link up a hundred or several hundred telex subscribers
and connect them to their automatic switching equip-
ment over a reduced number of telegraph channels.
